Skills

- AWS Cloud
- Gen AI Models
- LangGraph/LangChain
- Agentic AI
- Amazon SageMaker
- Amazon Bedrock
- Model Context Protocol(MCP)
- MLOps
- DevOps/Terraform
- GitHub Actions(CI/CD)
- Python

Education

Sathyabama University

Bachelor of Electronics and Telecommunication Engineering

Chennai

Jul 2017

Experience

Accenture

Aws Mlops Engineer, Accenture

Bengaluru

Jul 2022

- Designed and implemented AWS infrastructure solutions using Terraform, ensuring modular, reusable, and version-controlled code.
- Built and maintain CI/CD pipelines for machine learning models, enabling seamless deployment and scalable management of ML solutions.
- Automate model deployment, monitoring, and retraining for production environments using tools like Docker, Kubernetes, and Airflow.
- Monitor the performance of deployed models, troubleshoot systems, and implement solutions to ensure reliability, security, and scalability.
- Developed and deployed generative AI applications using Amazon Bedrock, leveraging models from Anthropic (Claude), Meta Llama, Cohere, and Stability AI.
- Created and executed stateful, graph-based agent workflows using LangGraph for applications involving multi-step reasoning, memory, and tool use.
- Optimize performance of machine learning systems and ensure robust monitoring, logging, and alerting in production.
- Troubleshoot issues and implement monitoring to track and maintain model health and system uptime.

Nokia

Cloud Engineer

Bengaluru

Dec 2020 - Jun 2022

- Mapped out and configured virtual networks (VPCs), subnets, route tables, NAT gateways, and VPNs in Telco Cloud.
- Ensure high availability and disaster recovery for all cloud services through backup planning and multi-region architectures.
- Collaborate with cross-functional teams to architect, deploy, and support cloud-based applications and data solutions.
- Implemented and monitored network security controls such as firewalls, NSGs, security groups, and traffic inspection tools.
- Integrated cloud networking with on-premises infrastructure for seamless workload migration and hybrid cloud support.
- Conducted network performance tuning, troubleshooting, and incident response using monitoring tools like Wireshark, CloudWatch.
- Maintain infrastructure documentation, deployment procedures, and architectural diagrams for ongoing support and compliance.
- Trained and mentored junior cloud engineers, fostering their technical skills and cloud expertise.
- Participated in industry conferences and meetups, staying up-to-date on the latest cloud technologies and best practices.
- Managed cloud billing and cost allocation, ensuring accurate and transparent accounting of cloud usage.

- Provisioned, configured, and managed core AWS services including EC2, S3, RDS, VPC, IAM, CloudWatch, and Route 53.
- Architected and deploy multi-tier architecture solutions on AWS to support production and development workloads.
- Manage cost optimization by right-sizing instances and optimizing resource usage to reduce cloud expenditures.
- Administered user access and permissions using IAM policies, roles, and groups following the principle of least privilege.
- Continuously review and improve AWS environment efficiency, security, and cost-effectiveness based on monitoring and usage metrics.
- Set up system performance and health using AWS CloudWatch, set alarms, troubleshoot issues, and perform resource optimization.

Awards

- Recipient of AWS All Builders Welcome Grant to attend AWS re:Invent 2024 in Las Vegas NV
- Winner of The PartyRock Generative AI Hackathon by AWS
- Amazon Q Accenture Premier League Winner
- Gen AI Mastermind Quizathon Finalists

Certifications

- AWS Certified AI Practitioner
- AWS Cloud Quest: Generative AI Practitioner
- AWS Certified Solutions Architect Associate
- HashiCorp Certified Terraform Associate
- AWS Partner Technical Accreditation
- AWS Partner: Generative AI Essentials
